

Philemon Sekwari Muleya

Bachelor of Science in Information and Knowledge Systems

Contact: 067 127 2394 | **Email:** philemonmuleya@gmail.com

Address: Pretoria, South Africa | **Website:** <https://philemonmuleya.co.za/>

Education

University of Pretoria, Pretoria

Concentration: **Computer Science and Software Development**

Relevant Coursework: Data Structures and algorithms, Concurrent Systems, Software Engineering, Database Systems, Computer Security, and ethics.

About

Final year BSc Information and Knowledge Systems student at the University of Pretoria, specializing in Computer Science and Software Development. I am aspiring Software Engineer with a deep interest in building scalable, secure, and efficient systems. My expertise spans the full stack from crafting modern interfaces in React and Vue.js to engineering low-level networking tools and multithreaded systems using Go, Java, and C++. With a history in Lead integration and DevOps roles, I am committed to technical excellence, containerized deployments and writing highly maintainable, documented code.

Skills

- **Programming Languages:** Proficient in C#, C++, Java, Go, JavaScript (ES6+), PHP, and Python.
- **Web Frameworks & Tools:** Experience with ASP.NET Core, Express.js, Vue.js, Angular, and React.
- **Systems & Architecture:** Strong understanding of Multithreading and concurrency (C++, Java), API development, and software design patterns.
- **DevOps & Infrastructure:** Skilled in containerizing applications with Docker and automating deployments via GitHub Action CI/CD pipelines.
- **Databases & Security:** Knowledgeable in Relational, NOSQL, and Object-oriented databases, alongside CIAAAA security principles and encryption.

Projects

- **Secure File Sharing Platform**
 - **Repository:** [SecureFileSharingPlatform](#)
 - **Description:** Built a file sharing system with end-to-end encryption ensuring access only to intended users.
 - **Role:** Lead Integration Engineer and Developer Operations (CI/CD)
- **E-commerce Store**
 - **Repository:** [PLM-18/Online Store](#)
 - **Description:** Angular frontend with C# .NET API backend supporting cart, checkout, and user auth.
- **Workout Application**
 - **Repository:** [PLM-18/Workout](#)
 - **Description:** Mobile fitness app built in Ionic for workout tracking.
- **FTP Server**
 - **Repository:** [PLM-18/FTPSERVER](#)
 - **Description:** A file watcher that implements the FTP protocol using basic sockets and uploads a file to the server whenever the user modifies the file.
- **Version Control Site**
 - **Repository:** [PLM-18/VersionControlSite](#)
 - **Description:** Collaborative coding platform with real-time file editing.
